

LEUKEMIA 360

#MeettheLeukemiaExperts

2:40 - 3:00 | ROOM 1

CAR-T cells research and development

Francine Garnache-Ottou & Jean-Roch Fabreguettes

- From novel targets to valorization
- GMP bioproduction for clinical development

2:40 - 3:00 | ROOM 2

Leukemia in-vivo models

Yves Collette & Cyril Broccardo

- A unique catalogue of experimental models for drug development
-

3:50 - 4:10 | ROOM 1

AML registries & observational studies

Christian Recher & Alexandra Coelho

- DATAML regional registry
- ALFA-PPP national observational study

3:50 - 4:10 | ROOM 2

Preclinical leukemia niche-like models

Lina Benajiba & Olivier Hérault

- Developing physiopathologically relevant preclinical models
 - A leukemic niche with optimized bone marrow microenvironment
-

4:55 - 5:15 | ROOM 1

Ex-vivo leukemia drug testing platforms

Raphaël Itzykson & Sylvain Garciaz

- Rainbow platform: pharmacodynamic monitoring by single-cell omics
- A platform for drug sensitivity and resistance profiling in hematology

4:55 - 5:15 | ROOM 2

Leukemia patient databases and biocollections

Claude Preudhomme & Jean-Jacques Kiladjian

- A central, clinically annotated AML biocollection
 - FIMBANK, a national multicenter clinical biology database for myeloproliferative disorders
-
